One (left) has David Tennant and the other (right) has Wil Wheaton. UPDATE: The release has been pushed back. It should be out on December 18th. Funko Pop!s are some of the coolest collectible figures ever made. They are basically vinyl figures that work on and off of the back of a flexible vinyl sheet. There are three different versions of this figure. The final two versions (those with Wil Wheaton and David Tennant) are still coming, but I had a pre-order for the first one. I can honestly say I don't like either of these characters, so I wouldn't have been happy with the final version anyways. But I really wanted the first one, since it is a David Tennant Pop! As I said, the first David Tennant is out, and it is his final appearance in Doctor Who! While the final version doesn't come with the paperwork, this version does. It is one of the rarest of the year. If you are looking to complete your Doctor Who collection, this is a great way to do it. It is the only one, so I think you need to act quickly if you want to get one. As of now, it is only available for sale online. I will update this post when it becomes available elsewhere. I haven't heard anything about it, but I have heard about some other rare figures being available in the

Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. (video: 1:15 min.) The AutoCAD Editor team is at Autodesk University, near Boston. Markup Assist is the first new Autodesk feature to be announced for Release 2018.2. The team has been quietly testing the feature for some time now, and we're very excited to announce the public release. Markup Assist is a unique feature that enables you to import and incorporate feedback into your designs from printed paper or PDFs. The "paper-based" feedback can be from a design review or an engineering iteration of the design. You can insert feedback directly into your drawing or project or incorporate it into another drawing. You can also import information directly into your drawing from a set of
