
HD Online Player (mkvmerge Gui V5.9.0 Free Download) WORK

I'm trying to split using MKVToolNix, but when I start multiplexing, I'm getting errors "Invalid start/end specification for '--split' in .plist" and "Invalid start/end specification for '--split' in .plist as shown below." I also tried using MKVToolNix but it won't work properly. If anyone knows how to solve this problem please help me with it. I am trying to split into 3 parts so the file size should be like

below. But my problem is that MP4 and MKV file only have 1 part which I can't separate. I tried using MKVToolNix, but without success.
