Traktor DJ 2 Mac/Win+Audio Keys [Activate 2020] All rights reservedQ: How do I find which assemblies implement an interface in vb.net? Given the following: Namespace MyNamespace Interface IA End Interface End Namespace How do I get a list of all the assemblies which implement the interface IA? A: You can't - the .Net Framework is extensible, but the "classic".Net Framework is not. You have to assume the framework, unless you want to sort of "hack" it (as in Reflection, ILSpy is pretty rad, and will allow you to see the IL as output by a compiler). Q: Manifest of intent app must be signed by the android key? I create an intent app. The manifest of the intent app contains: The android key is set to debug. I tried to run, it says Permission denied (again). I have restart Android Studio, but the error still exists. What can I do? A: At first, Permission denied (again). means you have already revoked this permission. This happens when you tried to use any apk with App signing enabled, because you need to sign your code for each platform that you use, as this answer explains. So, you should be able to remove this permission from your app's android:protectionLevel attribute. If you want to know how to modify that attribute, see this answer. "Finished" 3e33713323
