To determine the effect of transforming growth factor (TGF) beta 1 or TGF beta 3 on the organization of the bovine endometrium. Endometrial tissues were collected from cyclic (n = 16) and pregnant (n = 13) cows at specific locations along the reproductive tract. Sections were stained for the presence of TGF-beta 1, 3, type II collagen (Col II), and matrix metalloproteinase 9 (MMP-9). Col II and MMP-9 were immunolocalized using antibodies of the NH2- and COOH-terminal peptide, respectively, of type II procollagen. Immunofluorescence was used to assess the expression and distribution of TGF-beta 1 and 3 and Col II in epithelial cells. The pattern and intensity of immunofluorescence staining were compared among cyclic and pregnant cows. TGF-beta 1, 3, and Col II were localized in bovine endometrial stroma, while the enzyme was localized in luminal epithelial cells. The presence of both peptides in luminal epithelial cells was higher in pregnant than in cyclic cows. Furthermore, TGF-beta 1 and 3 were localized at the luminal aspect of epithelial cells, while

What's New In Stellar Repair For Excel?

Stellar Repair for Excel is a utility that enables you to recover broken Excel documents. You can either scan all Excel files that are located on your computer or select a list of specific documents. Key Features: * Recovering multiple Excel files at once * Scanning multiple documents at once * Preview a document before you start the recovery process * Repair multiple Excel documents * Output a log of the errors that occurred during the recovery process Stellar Repair for Word is a powerful tool that is capable of recovering damaged or broken Microsoft Word documents and other Microsoft Office formats. It is a utility that does not even require a previous version of the original file, as it will automatically find and repair the corrupted or damaged file. Add folders or multiple files to the recovery list The application can handle multiple documents at once and it can even scan entire folders for corrupted spreadsheets. After the documents are found and recovered, they appear as a list inside the application and you can preview their contents before starting the repair process. You can manually select which ones to be skipped if you do not want to save all of them. Unfortunately, the preview window is actually just a snapshot of the document. You cannot edit or move around the sheets, which might prove a bit inconvenient if you have long Excel tables or multiple spreadsheets and you want to see if they are complete. View logs and the current status of the recovery While the recovery process is underway, Stellar Repair for Word displays various bits of information about the file, including the original size, name, extension and whether the recovery was successfully or not. You can also visualize the date and time at which the process was completed. The log can be saved to your computer for further reference, which can come in handy if you want to know where the recovery went wrong. Using the data generated inside, you can also document yourself about the meaning of the errors that occurred. In conclusion Stellar Repair for Word is a simple but powerful application that gets you out of trouble whenever your Excel spreadsheets are corrupted by viruses or hard disk errors. The user interface is easy to use and intuitive, but the fact that you cannot properly explore the document before you save it can be an annoying disadvantage.
