You're not shy. You're very outgoing, attractive and funny." His eyes, he said, spoke directly to her heart. "That's why I'm attracted to you so much." After they'd dressed and eaten, they went to the parking lot of a night club called the After Lantern. He said he loved the way she looked as they walked and they held hands the whole way. In the parking lot, he held her hand tight and didn't let go, despite the crowds. Inside the club, she knew how to handle any situation and there was no way she could be frightened by all the people. She loved the music and it was fun to dance. "Not that I do very much dancing," she told him. "I try to not overdo it." He wasn't sure if he was supposed to say anything or not, so he just enjoyed looking at her. He would have made a different decision if he had been paying attention. Because, her dress was wet, he touched her bare foot and it came to him that she didn't wear a panty hose. She took a long time to tell him that she'd taken the train in and that she was sorry he got wet. She never seemed to mind that.

They left the club and he was so excited to be with her that he couldn't take his eyes off her. He'd kissed her at the club parking lot, and though she told him she liked to wait, he asked her to kiss him again and they couldn't wait to be in their own room. Copyright 2013

The trilogy is a series of three comedic novels by Dan Abrams & Dave Buck, in which two dimwitted men attempt to gain management status in a management firm. The series consists of three books: The Trilogy and Then Some (1999), The Buck

---

Story (2000), and The Catch (2002), all of which have been adapted in a television series with the same name. The books are loosely adapted from the television series. The team is portrayed in the books as being somewhat incompetent, led by Dan, who is portrayed as having a high opinion of himself, which causes him to often make poor decisions. In the first book, he has a relationship with a female client, which ends before the series ends. The team becomes more successful over the course of the books and become somewhat competent at leading the office. Dave, who is more competent than Dan at the beginning of the first book, is portrayed as the most competent person in the office at the end. Contents The trio of Dan, Dave and Jim manage the Buck Company, a consultancy firm that brings in clients in a variety of industries. The three men are

---

portrayed as hopelessly incompetent (save for Dave, who never seems to be more than one step ahead of Dan) and, according to Larry, don't know how to get a man who is used to working alone, like himself, to work with a group. The trio are virtually never seen without their trademark machine, Buck's Mustache, which is usually seen after a mistake and is often used for laughs. The series was about growing up (or in one case, down), learning new things, coming of age, and trying to fit in with new, more intelligent people. Not only did the trio have to learn new things, but they learned while living with Larry, a girlfriend of Mikel, the author of the first book. Their first day was marked with the "tradition of the buttering of the toast." The trio then learn about Pete; his lack of intelligence, his constant feelings of inadequacy and his unique voice. They then learn about Mikel's feelings of

---

inadequacy. Mikel then tells the trio about his high school experiences, followed by Dan and Dave's teen years, and their own adult experiences. It starts with the first book, The Trilogy and Then Some. The trio are a team that sets up management consulting firm, The Buck Company, in an office space located at 666 Fulton Street. The first client they have
