here's my display link and would really appreciate it if you could help me out! A: . Do not wrap your link around a meta tag, just embed it directly in your content. As for the style, I'm not sure why you are trying to do this. Have you considered: 1) Making a parent div with overflow: scroll? 2) hiding the wrapper in your image with overflow:hidden;? Airway inflammation is a hallmark of asthma and chronic obstructive pulmonary disease (COPD), however, asthma alone currently affects 25 million Americans, making asthma the most common cause of school absenteeism. Although the causes of asthma are not entirely known, evidence suggests that environmental exposures can affect the onset of the disease. Several epidemiological studies have shown that environmental exposures to air pollutants are associated with asthma and COPD.1 Exposure to specific chemicals such as diesel exhaust, high temperatures, and ozone is linked to a higher incidence of asthma.2-3 Asthma symptoms are also exacerbated by cold temperatures, 4 suggesting that cold temperature exposure may trigger asthma exacerbations. However, little is known about the effects of cold temperature exposure and asthma. You are invited to participate in an experiment aimed at evaluating the effects of cold weather on asthma symptoms. The study is being conducted at John Hopkins University by undergraduate and graduate students as a public service. You will be asked to complete a brief survey about your asthma and your feelings about cold weather. The goal of the experiment is to examine whether or not a brief cold exposure (15 to 20 minutes) in cold weather (48 degrees Fahrenheit) impacts the symptoms of asthma. Every day, before going to sleep, you will be asked to breathe into a research instrument measuring the level of airway inflammation. If you wake up in the night with asthma symptoms, the airway inflammation will be measured the following morning before going to bed. Cold temperature exposure will also be measured and recorded every day. These measures will help determine whether or not there are differences in airway inflammation before and after the exposure to cold weather. This experiment is being conducted to provide insight into asthma, which can lead to better treatment of asthma./* * Copyright (c) 2005 Silicon Graphics, Inc. * All Rights Reserved. * * This program is free software; you can redistribute it and/or * modify it under the terms of the GNU General Public License as * published by the Free Software Foundation

I would like the titles of the items selected to be placed in a listbox. The items are all tuples, I haven't converted them to strings yet. I am having an issue where the program will not recognize the item text, but when I look at the value in the list, I get it. I have tried using the gettag function, and the item binding function from the tkinter documentation. Here is some sample code. import tkinter import tkinter.messagebox import tkinter.ttk as ttk import csv csv_file = open('sample_test.csv', 'r') csv_data = csv.reader(csv_file
