Stop! In every level there will be a yellow ball or a target to hit. You need to find a way to let the ball touch these targets and it will disappear. But be careful, as there are a lot of obstacles between the ball and the target, so you need to be very accurate in what you do.

Besides, there are lots of places in the environment that the ball can go. Bull's eye To kill a target, you have to move the ball towards the target or the bullseye. A good strategy is to control the ball and then push it towards the target while your movements are limited by the walls and the floor. There are a lot of different objects and rooms that you can interact with, like walls, doors, fans, light switches or other balls to hit. It is also possible to control the direction of the ball or the other elements. You can use all the elements to either hit the ball or avoid it. Controls: Use the left mouse button to move the ball and the spacebar to move the camera. A narrative-driven adventure game with some light platforming mechanics and a retro style. Solitaire: A modern puzzle game made in the vein of the aforementioned Gunpoint. Gameplay-Heavy Rain: This is a point & click adventure game with some fun elements of third-person shooting. You play as Ethan Winters, a programmer who gets transported into the body of his dead daughter. You'll explore a bunch of small town areas, interacting with different NPCs and discovering more of what happened to your daughter. It's a pretty cool, atmospheric game, and the puzzles are actually pretty challenging. Solitaire: This game takes place in the same universe as
