The call to vote is on a year before the election; political parties and candidates have one more month to convince the faithful they're the right choice to lead the nation. The Liberal Leader Justin Trudeau and the NDP's Jagmeet Singh will be the two leaders campaigning in person. Trudeau will be in Toronto and Singh will be in Vancouver and Victoria. The Conservative campaign will be led by Leader Andrew Scheer, who is also expected to visit Toronto this week. Trudeau will be campaigning across the country and visiting communities in areas of the country that voted NDP in the 2015 election. He plans to announce more details about his 2017 team in Toronto on Wednesday. In all the seats the Liberals currently hold, the party will have a full slate of candidates. Some Liberals have already been campaigning across Ontario, like Toronto Centre MP Anthony Housefather. He's one of two Liberal candidates in the 2017 election, along with Toronto Centre's Frank Valeriote. Valeriote is running for his second term as an MP. He's also chairing the Liberal party's Ontario wing. A spokesperson for the Liberal party said there will be 130 candidates in total, including six female MPs. Pierre-Luc Dusseault, who ran in 2015, has also announced his intention to run in Ottawa-Vanier. The Liberal, NDP and Conservative candidates in each riding

Download free engineering calculator software. Calculators. What is a Graphing calculator? .1. Field of the Invention The present invention relates to a video camera system. 2. Description of the Related Art In a video camera system of the prior art, a camera and a display apparatus (including a television receiver or a video display) are separate and independent apparatuses. Thus, it is generally necessary to align two separate display screens in order to put together the image picked up by the camera and the image displayed on the display screen. To this end, in the video camera system of the prior art, a playback apparatus, which has a display screen that can be adjusted in an arbitrary direction, is connected to the camera via a cable. When the display apparatus is selected by the playback apparatus, the image picked up by the camera is displayed on the display screen of the display apparatus. At the same time, the displayed image is adjusted in the direction corresponding to the angle with respect to the display screen of the display apparatus. In this video camera system of the prior art, while the orientation of the camera is adjusted, the display apparatus is used
