
Seliger And Shohamy 1989.pdf [Extra Quality]

[Download](#)

This book was published by Oxford University Press in 1989. It is 256 pages long and is in print and available for free online. In 1989 the author of the book was Herbert W. Seliger and the coauthor was Elana Shohamy. The author of the book had the following subjects which include a research methodology, and secondary reading list: - English language, - Applied linguistics, - Research methods, The objectives are: - "to provide new perspectives in research

methodology", - "to reflect on the relationship between the methodologies of study and language teaching and learning", - "to consider the application of such research methods in the teaching of the English language", - "to examine the application of such research methods in language teaching and learning". The book is broken into 13 chapters (preface, introduction, and so on) and each chapter is written by a different person. The other chapters are: An introduction to the book and to research methodology The contribution of research methods in

language teaching and learning, The relationship between the methodologies of study and language teaching and learning The research methodology and its application The relationship between research and language teaching and learning Research methodology and relevance of second language teaching and learning The role of teacher in language teaching and learning Instrumental methods of research Research experience How to teach research A brief statement of results Editorial notes Bibliography References Long,

T.R. (Ed.) (1989).

Handbooks of research on SLA or applied linguistics, (Wiley).
