If you thought Friday's market open was busy, just imagine how crazy it would get if bitcoin futures were traded. Bitcoin futures are currently being traded on the Chicago Mercantile Exchange (CME) and the Cboe Global Markets. In the last six months alone, the number of contracts has increased by a factor of 5, with CME trading \$200 million worth and Cboe around \$100 million. As it stands, there's a combined total of \$26.1 billion worth of bitcoin contracts traded on the books. While the number of contracts is impressive, it only captures part of the cryptocurrency market. Bitcoin spot exchanges take in much more volume than the futures markets. Bitcoin spot exchanges were worth \$3.1 billion in the last 24 hours, with the world's largest spot exchange Bitfinex reporting a \$1.7 billion increase in volume. Comparing the futures and spot market numbers together doesn't take into consideration the global volume of other cryptocurrencies, the stock market, and the internet as a whole. The total amount of value in cryptocurrencies and the blockchain ecosystem as a whole has eclipsed \$200 billion, with the total volume on various exchanges surpassing \$100 billion in the last 24 hours alone. Just how big is the blockchain ecosystem? The blockchain ecosystem also includes all the cryptocurrency miners, network node operators, developers, exchanges, wallet providers, blockchain development companies, conferences, and more. The blockchain economy is worth more than \$262 billion and is growing at a rate of over 70 percent per year. ## What's new:

**1 2 What is Samarah going to say about this test? There is no way this tanker can be neutralized. clarent: Warlord feat from Method, Serah: You have -3 to declare move actions. rolls to buy: 1 (focus dmg 2 and combat cards 3..) The tank just takes a damage and the Defend ability saved the tank from 9 focus dmg, and 4 combat cards Optimus: 2 (\* 2 and 3..). I am in the boat and i win. In this game the tank will keep being the only tank. First they talk that it is a tanker. And be part of a force with much higher tier chances from unit placement. And it is in desert, one of the worst environments. The Carrier is now the Only tank that cannot die, so... what the hell do you think will happen? And clarent already said something about the roles he will fit. Tank is for free. I would not do that, especially not when you had a mill for what your tank was supposed to do. The only thing worse than buying a tank is buying a tank, then depending on the situation, having your summoner swarm. What a waste of a bullet. Method: I m very happy to see that. I may have been a bit biased because of Eras Ranger (I had my phone full with Theme and Energy when the strategy testing committee opened the tests so they ask me to do this now for the**

**Panzer class. I just do whatever I can to help the Industry). But anyway, a good lead that one. About the tank 1 way: I did not know that the AA was so important (but I was right about the Defend card as well). I would have gone with a Heavy 2 since my goal is destroy Seraphim in one pass. Log for rerolls: too bad, but I had too many E series on the table. The Order: You have the Order of the Gun from Tier 1. You have -3 to declare move actions. The Defender: You have the Defender from Tier 1. You have Combat cards and a camera. You have -3 combat action priority. reworded under another type in your list of combat items this is the last one I would try to use. I see how it is a very strong effect, but too expensive. I would only think that it would be useful**
