Русский Сейчас How to Play? A: Mustafa game is an Action, Adventure, Racing game. Also this game you can Download from the Official Website.Q: How to make

the column with a value in a column as a row? Here's an example of what I have :

```
+----+-----+ | id | type | +----+-----+ | 1
| A | | 2 | A | | 3 | B | +----+-----+
What I'd like is a result like this : +----+-----+ |
id | type | +----+-----+ | 1 | (A,A,A) | | 2
| (A,A,A) | | 3 | (B,B,B) | +----+-----+
```

How would I do that? I tried pivoting with multi-by and I also tried pivoting on a unique column but it doesn't seem to work.

A: This is called hierarchical clustering. You need to look up R functions for that. A:

```
SELECT id, GROUP_CONCAT(type) AS type
FROM mytable GROUP BY id;
```

If id is a column in the table, then you don't need to GROUP BY.
