Easy To Do can be installed with a single click, and you can customize the database to suit your needs. It comes with a built-in help file that comes with videos, as well as a help and FAQ category.

It also supports a scheduler with customizable options such as types of tasks, as well as how often they are recurring. Nitrogen Notes

Description: Nitrogen Notes is a free PDF and Evernote plugin for easy collaboration between colleagues who use Nitrogen with Microsoft Office, Microsoft Lync, and Google Documents. Why use Nitrogen Notes? Work hard all day, and review

your notes the next day and realize you don't have the info you need. You're in the middle of a meeting, and you write down something important in your Evernote. That nice lady asks you to take a note, and you quickly type it into your smartphone. Unfortunately, you don't have the chance to share or collaborate on that note. When you're writing a note, you'd love for another

person to write his comments and save it right away. But you can't because they use different software, and you don't want to switch to theirs. You have a great idea for your next presentation, but your colleagues are not interested. You plan to send the presentation via email, but you have to do it in one day. In all these cases, you'd love to collaborate with people who work with

you but with different software. Nitrogen Notes uses Nitrogen's technology to seamlessly collaborate. It works with the same apps you use today, so there is no need to learn another new app. Nitrogen Notes works with: Microsoft Office 2016, 2016 for Windows, Office 365/365 ProPlus Microsoft Lync 2016, 2013 for Windows, Office 365/365 ProPlus Google Documents, Google Sheets,

Google Docs How does Nitrogen Notes work? Just double-click in Microsoft Word, Microsoft PowerPoint, or Microsoft Excel, and Nitrogen Notes opens in a new tab on your computer. When you go back to the Office app, you can use the Nitrogen Notes plugin and collaborate with anyone who is using the same app. Additionally, Nitrogen Notes is integrated with Microsoft IntelliSense so you don't

need to jump between notes and texts to collaborate. If you install Nitrogen Notes in Windows 10, it integrates with Microsoft's OneNote, so it is easier to collaborate within the same app and with your OneNote account
