ROA development progress can be found on Realm of Alters The high-level VR campaign for which I created the interface and animation is now 100% complete. All I need to do now is create the experience. It would be easy for me to spend another 18 months polishing the UI and the animation, but I feel that I have just scratched the surface, and that even a larger team of developers couldn't come up with something as good as what I have

done. Hopefully this will prove that. High-Level VR Campaign So I came up with the idea for a high-level VR campaign that would see the player get progressively better at fighting the enemies within the walls of Faerie. At first it would be easy enough to kill the grunts and keycards, but later on it would turn into actual platforming, where you are forced to think and react quickly, but you also have the benefit of knowledge. Space Station Invader VR Features Key:

About the game: You must have played Tolkien's opus The Hobbit, you will recognize the inspired melodies of the Maori people (predates the film) that you love so much. Therefore, it's natural to think that the good guys have instruments with that kind of melody. This fantasy movie by Peter Jackson tells us a new story, however, filled with mystic and magic - and this is exactly where we should enjoy music.

Special collection: We wanted to offer a "special pack" of game music already designed like the original soundtrack. Each song is faithfully reconstructed in a style of more than 20 years: Modern and unique music, created by higher dozens of musicians, musicians who band together in groups to create one distinguished sound. It's the only opportunity to listen to these compositions before the movie was released.

Enemy of the music: For recording sessions, the popular filmmaking director could connect directly to any number of musicians, experts in the field at hand. For this special version, we could only convince experts and recommend a few options in support of the project.

Multitrack DVD: One of the highlights in the game, we decided to record the excellent soundtrack in the Multitrack DVD format, so when you play the game you can purchase it already prepared, just add a plastic!

How to install the game's soundtrack on both DVD and CD?

1. For the people who want to download the entire soundtrack on their PCs, we recommend using this very product. Once downloaded, extract the content into the game's main directory and the game will appear with the music soundtrack.
2. Download the soundtrack in the Multitrack format too: copy file "the_music_do_not_clone.mrd" found in "The Music Do Not Clones Extract" folder to the main directory of the game (anywhere on the hard disk).

For the people who want to download the entire soundtrack on their Macs on cd-shop.de.

1. Download in the Multitrack format: copy file "the_music_do_not_clone.mrd"

-----## LEVEL 1 -----CREATURES-----

UNIQUE CREATURE RACE!! To start off with, a lot of Dwelvers will have 4 different tribes and each of them will have a unique race and personality. The tribes are as follows: BANTUI (the butcher) - the butchers are known to have quick tempers and a sense of justice! They are the brutes of the Dwelvers world, they do not know the meaning of mercy and that's why their parents sent them to the dungeon. Because of this, the bantui were sold as slaves in the market and raised in the dungeon. Thus earning the name "The Butcher". GORBA (the baker) - The GORBA is the artisan of the Dwelvers world. They are the creative souls that makes everything look good. They are born in the dungeon because of the climate which they require. Thus they were sent to work in the market. They are very social people and friendly towards others. They hate it when others call them ugly names. NAKA (the fishermen) - Fish are the food of the Dwelvers world. The NAKA is the God of the ocean. All other creatures are under their kingdom. The NAKA have a good

culture and a fondness for poetry. Thus they were not sent to the dungeon. Instead they were given a special task in the dwellers world to guard the waters and protect the innocent. EMUN (the farmers) - The EMUN is the craftsman and works really well in groups. The Dwellers have known them for ages. They give them special power, without which the dwellers world would never work. The EMUN works in pairs of 2 with a bigger team of 3. They must try and be seen with their partners, or else they will get fired. They should be fired if they get caught with another partner. The EMUN also have a romantic interest in the GORBA tribe. SA'WAT (the carpenters) - The SA'WAT are the ones that can build bigger and better things than the rest. They are the leaders of the Dwellers world. They are the big shots of the Dwellers world. They can control more creatures than anyone else. However, they are often seen in different places that no one can find them. DANGORI (the blacksmith) - It is said that the DANGORI can pull off anything they can imagine!
