About the Book A mesmerizing debut novel from Donna Dunbar, a young California writer, about a woman's search for her past and herself. Chloe Gleason is an acclaimed cellist who owns a shop in a fashionable neighborhood in the Silver Lake district of Los Angeles. She has everything it takes to leave the past behind and start a new life—except, in fact, the last few months before her father's sudden, tragic suicide, she hasn't been herself. Her world turns upside down when she tries to remember an incident from her childhood, and she becomes obsessed with the aftermath of a woman's suicide at the infamous Broad—"the Sink"—and with the five young women who allegedly committed suicide there and who Chloe knows just happened to be the daughters of a nationally known magician. To ferret out answers, she uncovers her own shadowy past, but she's ultimately forced to confront her own demons in the process. A diverse, multifaceted novel, *The Sink and the Star* examines the fantasy of escaping the past, the pain of loss, and the strange, complex relationships we may find ourselves entangled in as we try to find our way through the world. Ventilator-associated pneumonia: baseline characteristics and risk factors for mortality. To assess risk factors for hospital mortality in patients hospitalized in acute care with a diagnosis of ventilator-associated pneumonia (VAP). Retrospective cohort study. All acute care, nonpsychiatric hospitals in Ontario, Canada. All patients who were discharged from acute care hospitals in Ontario and diagnosed with VAP between February 1, 1995 and March 31, 1999. None. The overall mortality rate from VAP was 12.8% (1465 of 11,608 patients) and was highest in hospitals with the highest case-mix index (CMI) for VAP. A CMI of greater than 0.15 was associated with a nearly 3-fold increase in the risk for death among patients who were not receiving mechanical ventilation prior to VAP diagnosis and without comorbid conditions. A CMI of less than 0.15 was associated with a nearly 4-fold increase in the risk for death among patients who were receiving mechanical ventilation before the diagnosis of VAP and were deemed to be at low risk for mortality. Although the incidence of VAP is increasing, the overall mortality rate in patients with VAP is declining. The risk for mortality can be predicted by the CMI for VAP, a measure of hospital case mix. Identification of VAP patients at risk of death may help with allocation of hospital resources. There are, for some people, only three acceptable forms of sexual experience: an open one, a monogamous one, and the kind they can have in a Swingers party. I'm betting you've heard the term "Swinger" before. A Swinger party is an adult party in which sexual acts between couples are encouraged, though only people who are prepared to make an honest commitment are allowed to participate. Are you tired of hiding the fact that your new lover's ex-wife can see you jerking off together in the kitchen? Or are you just a little paranoid about the neighbors seeing you with your new girlfriend? Then this Swinger party in Philadelphia is right up your alley. It has an emphasis on privacy, with a guest list that will ensure you can get away with anything without attracting attention or embarrassing yourself. With a house full of bored couples looking for something to spice up their sex lives, you'll be in heaven. We've rated it a 9. Get the details here. Disclaimer: We are not affiliated with Swinger
