The user interface is divided into 6 simple sections. The first, "Downloads and Meta-Info", allows you to change the settings for your downloads. You can select the file formats you want to download. There is also the capability to rename files, change the size of the file, split files, and download all files in a directory. Your downloads can be paused or stopped. The settings for this are available in the second section, "Settings." This section allows you to change the location of your downloads, and to set individual options for your downloads such as the completion of a download. You can also choose to automatically download with FreeRapid Downloader when a file is added to your clipboard. FreeRapid Downloader's last section, "Organize and Share," will give you a list of your downloads. You can sort your downloads and filter them by file type, file size, and file name. What's New In FreeRapid Downloader?

FreeRapid Downloader is a reliable file downloader that can grab content from RapidShare, Picasa, Facebook, DepositFiles, 4shared, to name a few. Its engine is based on a list of plugins that make it possible to download from specific websites. As such, it is not a general download manager (works only with supported domains). The market is crowded with applications bent on downloading content from popular sharing and media websites. While many of them concentrate on a single service, FreeRapid Downloader is able to process data from a generous list of such websites. Choose from a large variety of skins The application was designed with simplicity in mind, thus beginners and professionals will be able to enjoy the experience equally. Not to mention that it doesn't require installation and the archive that holds all the files is portable. While it may impress feature-wise, it fails to stimulate the eyes. Its appearance is plain simple and even if we do not judge a book by its covers, we dare say that a more appealing approach would greatly contribute to its popularity. Comfort comes from the generous selection of skins that prevent you from getting bored. Quickly downloads from a breathtaking amount of websites Amongst its most notable features is the support for multiple simultaneous downloads from different services, the automatic link detection (by closely monitoring the clipboard), the automatic shutdown options, CAPTCHA recognition and the support for streamed content. During our tests, it performed flawlessly. Compared to similar software, it's faster as far as the download speeds are concerned. To end with To conclude, FreeRapid Downloader is a good choice if you're looking for a download manager specialized in sharing websites. The list of supported services is quite reach, so you might be in for a treat if you give it a try.
