Set in the year 1384, during the early years of the Great Plague, but more importantly when the world is still changing, it is the time of the return of the monsters: the Evil Ones. As already they seek to take over the village, the plague brings with it a new trouble: losing your mind. What follows is a story of madness, victims of the plague and the Evil Ones: The citizens of the village slowly lose their minds and their sane selves to the presence of the Evil Ones; both, friend and foe. Shortly after a group of barbarians lead the villagers to safety in the village, the Evil Ones begins to throw the place's residents out. They don't know what's happening to them, but they know that it's not right. The few remaining villagers are convinced to seal the doors and gates and to barricade themselves in the town hall. It is here that a new, strange story is to unfold: with the village almost in ruins, villagers search for others willing to trust and help them, and search for a way to save the place. But how will they manage to defeat the Evil Ones? The first volume of The Book of Yorle was released on PC and will soon be available on PlayStation 4 and Xbox One platforms.

1. Field of the Invention This invention relates to an automatic power breaker system for an automatic transmission and more particularly relates to such a system which includes a combination of an engine and an automatic transmission. 2. Prior Art The use of an automatic transmission for an automatic power break switch is well known. Such a switch is typically connected between an automatic transmission input and an engine. When it is desired to start the engine, the switch contacts are closed to make an electrical connection, and then the switch is opened to disconnect the engine. Similarly, when the switch contacts are opened to disconnect the engine, it is also desired to disconnect the transmission from the engine. An important object of the present invention is to provide a very simple way to disconnect the automatic transmission from the automatic power switch.

Obesity remains a serious health problem and it is no secret that many people want to lose weight. Behavioral economists typically argue that "nudges" help individuals with various decisionmaking flaws to live longer, healthier, and better lives. In an article in the new issue of Regulation, Michael L. Marlow discusses how nudging by government differs from nudging by markets, and explains why market nudging is the more

1. Position the kiss into the correct position (you will only need to do this once).2. Put in the amount of water in the drink.3. Hit the button to begin.On a side note: some of you may wonder, is she really here? Yes, she is. She is real, virtual and very much alive. She does have a name, she loves her job, she's doing the job and she does not want you to stop, believe me, this is a girl you should pay attention to.It may seem a strange thing to get such a girl, or to get such a cool and awesome achievement. But don't worry.This achievement is based on more than a year of hard work of a very talented programmer, who won't be posting on the Internet anymore. What's left now is the polish of this game, and the production of new features. So stay tuned. If you want to support the development, donations are welcome. Anything you can do to keep this dream going and make it happen, we will be grateful.In other news: while creating this game, our programmer did visit many other games on the market to see the good and the bad, and he came across a few sites about how games are being developed. Most sites are quite well written and high quality. Only few sites, like the very famous 4chan seemed to low. But for this particular activity, 4chan is a good thing because it will help to publicise this game even more, and that's not all; our programmer do also appreciate 4chan, especially its users (the admins of 4chan probably read this article), as it is exactly their users we are testing our game on. So you could make it easier for him to keep the idea of this game

alive if you actually visit 4chan and get him something real (not only virtual), instead of just giving him virtual. This game is completely free, with no in-app purchases or unfair advertising, and it is highly unlikely to become any sort of 'addictive' that people are so scared of. So, why do we have an actual price? Because we want to cover the expenses of further development of this game, and bring some money into this project. The price is very low for what you get, and we even gave a discount, so the price is equal to the initial development costs, if you know what I mean. If this game gets any sales, the actual amount of money we will get will be less than what was actually the

William Jarvis Award The William Jarvis Award was established in 2004, named after the bibliophile and educational publisher William Jarvis (1811-1899). The Award is open to companies and services providing inclusive learning opportunities to children and young people regardless of their sexuality, gender, disability, faith or other personal characteristics. The Award was launched at the European Diversity in Rural Libraries Conference, held in York (UK) in October 2004. It celebrates the achievements of companies who have sought a high level of company excellence and achievements, by developing inclusive learning services, in particular, supporting children and young people with diverse learning needs and experiences. The Award is offered annually. Recipients must have demonstrated outstanding work in provision for children and young people with diverse needs. In 2019, the William Jarvis Award was won by the Welsh Childrens University College for the Arts. In 2008, the William Jarvis Award was

presented to the James Godfrey and his Hull Truck Series of Books, the organisers of the pioneer educational publication programme for Young People (YPP). The Award is open to any company or service providing inclusive learning opportunities for children and young people. Companies or organisations may be nominated by other organisations and praised for their outstanding work in provision for children and young people with diverse needs.
