In 2002, Autodesk acquired Graphisoft, a German design software company, and brought the Graphisoft and AutoCAD Activation Code brands together. In 2003, Autodesk split the Graphisoft brand into a separate business unit that focuses on web-based and mobile apps, and the Graphisoft brand became exclusive to AutoCAD and the company's other CAD-related software products. Since then, the Autodesk Graphisoft brand has only been used for web-based and mobile apps. AutoCAD allows users to create 2D drawings, 3D models and animation, and parametric models. It can also convert from 2D to 3D, create 3D PDF documents, and create and animate animated and still videos. This list provides a high-level view of the features of each of the AutoCAD apps. The specific capabilities of the app will vary, depending on the type of drawing (2D or 3D) and the level of access allowed to AutoCAD data. We've made an effort to describe the main features of each app, but be sure to check the app's official website for the full details. If there is a trend in the Caribbean media, it is the maelstrom of criticism that emanates from Washington, for which the island media is constantly being tagged. Since the 1991 collapse of the Commonwealth of Independent States (CIS), the Caribbean has been on the receiving end of a media barrage of "Caribbean bashing", emanating from the West and from Washington. The trend started with the so-called "new world order" of George HW Bush and continues with its modernisation under the helm of Barack Obama. Through the eyes of the media, we have learnt that Americans have no taste, no morals, no human values. No matter how high an office a person occupies, they remain "first and foremost" white. However, the Obama administration is seen to be much more accommodating towards non-whites. The reality, however, is that the US is an overwhelming white entity. Its African-Americans account for more than 12 percent of the population, but only make up less than eight percent of its top leadership positions in business and commerce. In the West Indies, the situation is reversed. There are hardly any senior leadership positions in the island media occupied by non-whites. Whites comprise more than 80 percent of all top leadership positions in the media. This dichotomy illustrates the divisive roles of the West and the US in the Caribbean. Caribbean states are pawns, the West's ballast. This is why Washington is at war with Venezuela, Cuba, Nicaragua and the Bolivarian Alliance of Our Americas (ALBA). The US's last frontier is the Caribbean. In the Caribbean, however, these so-called "anti-imperialist
