IBM SPSS STATISTICS V19.0.1 [thethingy] Setup Free |LINK|

Statistical analysis,data mining,ETL,ETL,Fermented rice with Coccinella septempunctata larvae enhances alpha-tocopherol, total free amino acids and mineral content in rice bran. The effects of the presence of Coccinella septempunctata larvae on contents of essential nutrients in rice bran and the formation of volatile compounds, including aldehydes and alcohols during fermentation were studied. Rice bran was fermented by C. septempunctata larvae for 2, 5, 8 and 10 days. Essential nutrients and volatile compounds in fermented rice bran were determined. Contents of total free amino acids (TFAA) in C. septempunctata fermented rice bran were increased from 21.6 mg/g to 51.2 mg/g and aldehydes and alcohols were increased from 88.8 mg/g to 98.5 mg/g. Rice bran with C. septempunctata larvae fermentation had the highest content of α-tocopherol (114.9 mg/kg), followed by rice bran fermented for 5 days and the non-fermented one. γ-tocopherol, γ-oryzanol and tannic acid contents were significantly increased by the use of C. septempunctata larvae. C. septempunctata larvae fermented rice bran can be added to cereals without losses of essential nutrients.Q: How to set text element in ViewBag with id I need to show content of a text with id in a page using ViewBag, but does not work. ViewBag.content[i].Text = site + ':' + url; I have this code, and the text not changed, even if it is really present. What is the correct way to do this? A: Try this: ViewBag.content.ToString().Replace("[i]", i.ToString()) Or, cleaner: ViewBag.content = ViewBag.content.Replace("[i]", i.ToString()) Although, I recommend you to use strongly typed Data transfer objects instead: [DisplayName("Content")] public string Content { get; set; } UPDATE: For better readability, you could also use a property getter: private int[] _contents;
