ITC-DMP-2CP, a unique polycyclic diterpenoid from Boesenbergia pandurata, exhibits antidiabetic activity and protects against inflammation and apoptosis in diabetic mouse model. ITC-DMP-2CP, a new diterpenoid isolated from Boesenbergia pandurata, was demonstrated to possess potent antidiabetic activity. The present study investigated the effect of ITC-DMP-2CP on β -cell damage, and showed that ITC-DMP-2CP could ameliorate glucose homeostasis and insulin secretion function in pancreatic β -cells by activating the Akt-eNOS signaling pathway. In addition, ITC-DMP-2CP could attenuate the inflammatory response and increase the expression of insulin gene in c6a93da74d
