I want to debug it using visual studio. I am new to c++,would you please help me? A: You can run a program with a single command like this: c:\> cls Microsoft (R) Windows (R) Command Line Shell Version 6.1.7601.17514 Copyright (C) Microsoft Corporation. All rights reserved. C:\> cd C:\Program Files\Microsoft Visual Studio 10.0\VC\BIN C:\Program Files\Microsoft Visual Studio 10.0\VC\BIN> copy bla.exe c:\ C:\Program Files\Microsoft Visual Studio 10.0\VC\BIN> bla.exe C:\ When you hit the enter key, the program is launched. The key thing here is that you call the program with the cd command, which changes directories to the directory of the file. This is very useful for temporarily debugging an executable that you have somewhere and don't know where the path is. Also, though commentators have expressed doubts that the Trump Team is in any position to craft a better North Korea framework agreement than the last deal, the North Koreans have expressed interest in a deal. But negotiations are beginning from a very tricky position: The North said in recent weeks it will not undertake any more nuclear or missile tests unless sanctions are lifted first. The United States and other nuclear-armed nations say it will need to complete these before they take it seriously. "I'd like to propose another suggestion," President Trump said at a summit in Singapore last June, "'Why don't we have the 12 nations c6a93da74d
