
Windows Vista Build 5231 X64 Full Version !!BETTER!!

Windows Vista Build 5231 is a pre-beta 2 build of Windows Vista. This is almost the same as build 5231.2 but is only available for x86 architecture. Microsoft posted a question on their forum that appeared to be related to the issues they found. Some users don't like the "Patch Options" feature that allows users to install updates using Windows Update. In this case, the user needs to restart the computer, and then he can choose to download updates using Windows Update, and not manually. Also, this feature does not work properly with updates already installed.

Windows Vista Build 5231 X64 Full Version
