Create easy rigs - Whether it's your first project or your ten millionth, you are designing the character rigs. Whether you are a graphic artist, animator, engineer or concept artist, animation is a construction of stories which require interplay of complex systems. To design a new character, all those rig elements should be gathered into a single place. Designing a simple rig for a carton can take hours if not days, and it doesn't have to be that way. When animating 2D characters, you have some parameters to work with, like profile, pose, expression and the handbones based rig. With Reallusion's new feature, you'll be able to set up these attributes of the rig in a matter of seconds. D-Pose mechanism - including the familiar D-Pose tools - will provide you with a consistent method to quickly add the appropriate poses to a character, defining all the possible poses of any part of the body. The D-Pose functionality is available not only in Reallusion's Realtime and Retrobone syncing tools, but it's also built into the skeletal workflow. New Easy Rig - A RIG you can use, No Rig is no longer a Rig Invented Separately is an additional template created for specific purposes. Those can be used to quickly create any kind of rig that you'd like to, including sculptures or characters. It comes in a number of customizable size and can be freely combined with other templates or exported as individual frames to be used in your projects. Cartoon Animator 4 is the ease and direct way to form characters from the pictures stored on your computer, with the ability to select from words and speech. Easy control over faces, eyes, skin, hair and clothes, as well as masking characters while animating, makes the process easy for the consumer. 5ec8ef588b
