New features still in beta include Live Gaussian Blur, Live Gradients, a new Neural Filter for photo restoration, and Share for Review—another collaboration feature. For Windows users, a new option lets you choose whether you want auto selection to happen faster or with more stability. The most current reviews can be found in our Photoshop CS6 series. My list of favorite Photoshop features is updated regularly, and you can see the shots and articles I've reviewed in my reviews section here. Let me know what other features you use! I'd love to hear which channels you visit when you search the Web. We're also bringing Share for Review into Photoshop. This week you'll be able to upload screenshots, or JPEG, GIF, or PNG files, for review from within the application.
