If you haven't tried it yet, the panorama effect is a fun way to create images. Panorama images are usually created from several photos and can be taken in any digital camera format. HDR is a method for creating more detail in images without blowing them up to the point that you can't see detail anymore. Since HDR files are large, they take longer to edit and can introduce glitches when you create them. This tutorial shows you how to create an HDR panorama. The first step is to create an HDR file using the techniques described in the article. Next, create the panorama from the HDR file by using the Panorama feature of your camera. The last step is to create a sharpening effect on the panorama. This final step makes the panorama look more like a single image rather than a series of photos that were stitched together to create the panorama.

In addition to plug-ins, which are mostly just synthetically-looking clip-art, Adobe Photoshop now has the ability to store a Zip file of pictures purchased from Google Image Search in its catalog. In other words, anything you want on the web can be quickly picked, inserted, and changed. We'll get to more of the enhancements to the text manipulation and layout tools, which are quite a bit deeper than they were previously when I devoted a section reviewing them nearly two years ago. But we're certainly still not done reviewing all the Photoshop enhancements introduced with this release. If you're not familiar with Kaleidoscope and the related Capture One application, we'll take a look at those next, along with Smart Objects and Smart Layer. Then it's back to the real-time visual effects on stock images to talk about the Smart Filter. After weeks of getting familiar with Lightroom, Adobe has some great new tools in the latest version of Photoshop. The most interesting feature for me is the new ability to use the Paint Bucket tool to quickly select parts of an image. I find this far more useful than a similar feature in the previous version. I've had my hands on Adobe Lightroom for a while now and have managed to get used to the new features, powerful tools and capabilities. The most important thing that so many people have said when I speak to them about it is that Lightroom "simplifies" the image editing process. The new features are truly amazing and for a number of people, that's what they wanted from their software. But nothing is perfect, especially when it comes to image editing, and I have so many questions and concerns that I cannot sleep at night.
