Is it possible to see the stack trace of exceptions that occurred in a Java program? I've seen in some source code from my company that the exception was thrown at a statement and all relevant information was printed out, but I didn't manage to find out how it was possible. A: You can use jstack to get the stack trace of the current thread: jstack The PID should be the process ID of your java program. To get the stack trace of the entire application, you can do that using jhat: jhat -classpath jhat is part of HotSpot's Java Mission Control, so you don't need to install anything to use it. A: First, you need to see the exception When you see an error like java.lang.OutOfMemoryError: PermGen space , you can see it in the output, for example in this case Exception in thread "main" java.lang.OutOfMemoryError: PermGen space at java.lang.ClassLoader.defineClass1(Native Method) at java.lang.ClassLoader.defineClass(ClassLoader.java:800) at java.security.SecureClassLoader.defineClass(SecureClassLoader.java:142) at java.net.URLClassLoader.defineClass(URLClassLoader.java:449) The stack trace isn't visible there. There is no output for the stack trace. It's already handled by jvm. But if you use jps -l, you will see it. After you find it out To see the stack trace of a certain exception, you
